

Workflow Optimization

Are you ready for tomorrow's challenges?

An environment of laboratory consolidation and high pressure to contain healthcare expenditure means you need to find ways to deliver more with less resources.

bioMérieux, as your partner, can help you look at your lab from a different angle. Together, we will analyze your existing lab structure and design a roadmap to optimize your laboratory workflow and performance.

Our Workflow Optimization solutions combine continuous improvement management techniques (LEAN Six Sigma, Kaizen, 5S...) to:

- Streamline processes to **improve lab efficiency** and **reduce waste**
- Increase productivity to absorb **larger workloads** with **improved time to result**
- Reduce costs to help **contain lab expenditure** or be able to **invest in new technology**
- Reallocate staff to **more added value tasks**

The art of doing more with less

Workflow optimization is a real art. Let us show you the keys to successful streamlining. Make use of our experience in biology, technology, automation, productivity, financial control, resource management... to take your lab to the next level!

Workflow Optimization

Take your performance to a higher level

OPTIMIZE RESOURCES

- Increase return on investment
- Improve throughput
- Increase lab operation profitability
- Eliminate redundant processes

MANAGE GROWING WORKLOADS

- Streamline processes
- Enhance productivity
- Allocate staff resources in line with workload variations
- Build flexibility to manage unexpected demands
- Develop internal skills to identify improvement opportunities

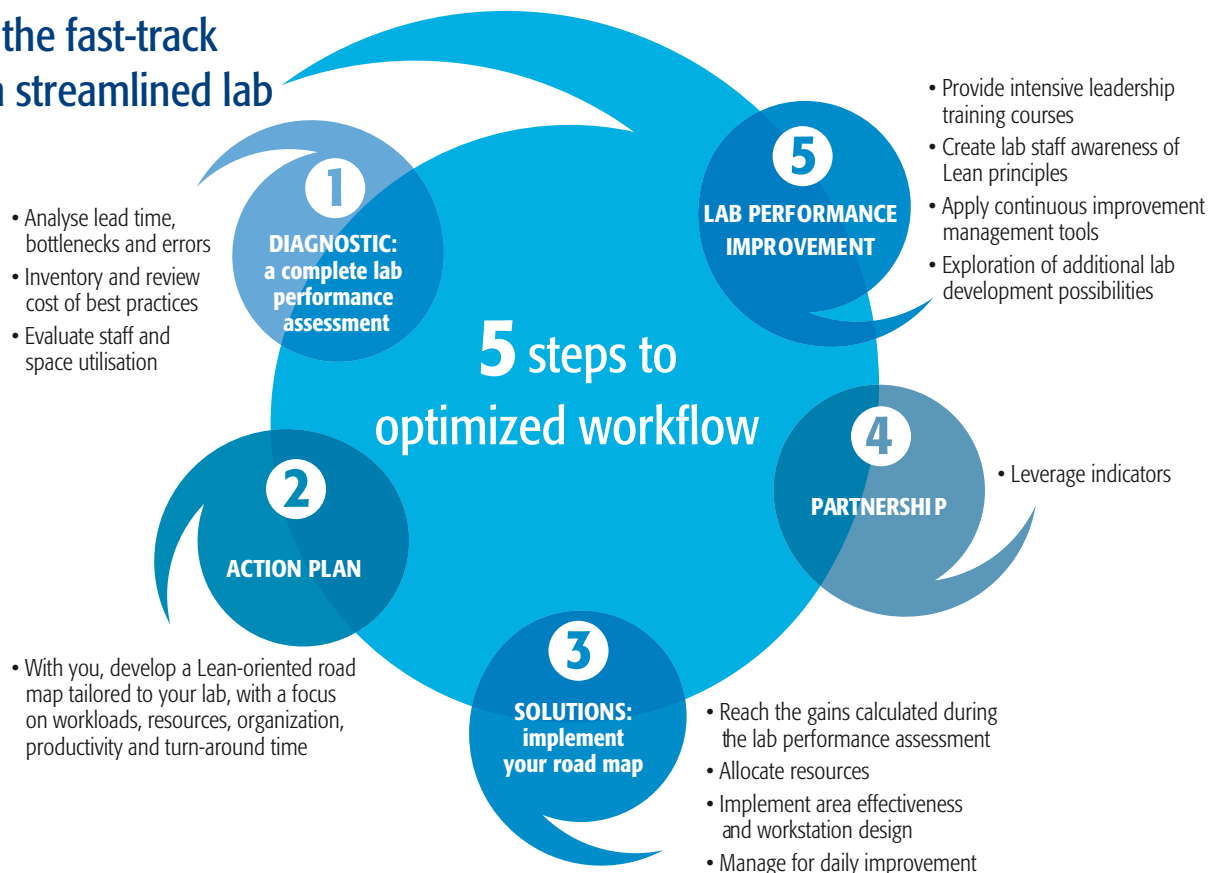

RAISE CLINICIAN SATISFACTION

- Reduce turn-around time
- Provide the highest quality results
- Reduce or eliminate errors

ENHANCE HUMAN RESOURCE MANAGEMENT

- Reduce negative stress and motivate staff
- Reduce strain and eliminate inappropriate movements
- Increase laboratory safety and reduce accidents

On the fast-track to a streamlined lab
